Raritan Valley Emergency Services Consulting & Education

*RVESCUE, LLC provides your agency member with administration of a medical evaluation through a confidential online questionnaire and approval process. Members will have a toll-free number to contact the reviewing medical authority with any questions. This will be one on a one-time only basis, and is not a replacement for your department medical clearance or evaluation process. All medical questionnaires are held by the reviewing vendor, and not RVESCUE or your agency. RVESCUE will supply your agency with a written proof of medical clearance and dates of same. No medical records or private health information is maintained by or property of RVESCUE, LLC. If full medical clearance via a physical is recommended by the screening medical authority, it is up to your agency to make those arrangements directly with the member, and is not included in the cost.
